Planning Logic – ServiceNow Employee Data Import

Project Overview

The spreadsheet is used to import employee information into ServiceNow using Import Sets and Transform Maps. It contains employee details such as Employee ID, Name, Email, Department, and Location.

- The uploaded spreadsheet data is first stored in an Import Set Table for temporary processing and validation.
- A Transform Map is then used to map these fields to the corresponding fields in the target Employee table.
- **Employee ID** is used as the unique identifier (coalesce field) to identify existing employees and update their records.
- New employees are inserted as new records.

Agile Terms

Sprint – a fixed period or duration in which a team works to complete a set of tasks.

Epic – a big task or project that is too large to complete in one sprint. It is broken down into smaller tasks (stories) that can be completed over multiple sprints.

Story – a small task. It is part of an Epic.

Story Point – a number that represents how much effort a story takes to complete (usually in the form of a Fibonacci series).

- 1 – Very Easy task
- 2 – Normal task
- 3 – Moderate task
- 5 – Difficult task

Story Point Scale: 1, 2, 3, 5

Sprint 1

Goal: Collect the employee data and load it into the Import Set Table.

Epic	Story ID	Story (Task)	Story Points
Data Collection (Epic 1)	USN1	Gathering Employee Data	2
	USN2	Preparing Spreadsheet (Employee ID, Name, Email, Department, Location)	1
Import Set Setup (Epic 2)	USN3	Creating Data Source and Import Set Table	3
	USN4	Loading Spreadsheet Data into Import Set Table	2

Epic	Story ID	Story (Task)	Story Points
	USN5	Validating Data in Import Set Table	3
Total Story Points			**11**

Sprint 2

Goal: Transform the staged data into the Employee table and verify the results.

Epic	Story ID	Story (Task)	Story Points
Transform Map (Epic 3)	USN6	Creating Transform Map (Import Set Table → Employee Table)	3
	USN7	Mapping Fields (Name, Email, Department, Location)	3
	USN8	Setting Employee ID as Coalesce Field (Unique Identifier)	5
Testing & Verification (Epic 4)	USN9	Running Transform (Update Existing / Insert New Records)	3
	USN10	Verifying Records in Employee Table	2
	USN11	Reviewing Import Logs and Handling Errors	3
Total Story Points			**19**

Total Story Points

Sprint 1 = 2+1+3+2+3 = 11

Sprint 2 = 3+3+5+3+2+3 = 19

Total Story Points = 11 + 19 = 30

Number of Sprints = 2

Velocity

Velocity = Total Story Points Completed ÷ Number of Sprints

Velocity = 30 ÷ 2 = 15 Story Points per Sprint

Your team's velocity is 15 Story Points per Sprint.
