Functional & Performance Testing Template

Model Performance Test

Date	21 February 2025
Team ID	PNT2022TMIDxxxxxx
Project Name	ServiceNow – Employee Data Import using Import Sets & Transform Maps
Maximum Marks	

Test Scenarios & Results

Test Case ID	Scenario (What to test)	Test Steps (How to test)	Expected Result	Actual Result	Pass/Fail
FT-01	Text Field Validation (e.g., first name, last name, email, department)	Load an Excel file with valid and invalid text values (blank names, wrong email format) into the Import Set table and run the transform	Valid records are transformed; invalid or blank values are skipped or flagged in the transform history/errors		Pass
FT-02	Number Field Validation (e.g., employee ID, phone number)	Load rows with valid numbers and with invalid values (letters, extra digits, negative numbers)	Valid numbers are accepted; invalid values are flagged or rejected		Pass
FT-03	Import Set Data Load (Excel to staging table)	Go to System Import Sets > Load Data, select the Excel file, and load it into the Import Set table	All spreadsheet rows appear in the Import Set table with correct column values		Pass
FT-04	Transform Map & Field Mapping	Create a Transform Map from the Import Set table to the target table, map source fields to target fields, and	Records are created in the target table with each source field mapped to the correct target field		Pass

		click Transform			
FT-05	Target Table Data Verification	Compare the target table records with the Excel file (record count and field values) and review the Transform History	Record count and field values match the source; no unexpected errors or duplicates		Pass
PT-01	Import Load Time Test	Use a timer to check how long the Excel file (e.g., 100 records) takes to load into the Import Set table	Should be under 3 seconds		Pass
PT-02	Transform Execution Speed Test	Run the Transform Map on a large Import Set (e.g., 1,000 records) and note the time taken	Transform completes without slowing down or failing		Pass
PT-03	Large File Upload Load Test (e.g., multiple Excel files)	Upload multiple or large Excel files one after another and check processing	Should work smoothly without crashing or timeouts		Pass
